Introduction

GT Chemicals is a company specializing in the production of general chemicals.

This includes amongst others, Cleaning Detergents, Degreases, Sanitizers and Paints.

GT Chemicals strives to provide its customers with, not only performance driven chemicals, but also friendly, efficient and personal service.

History

The company, originally called RT Chemicals was established in 1987 by the Wimbush brothers. The Closed Corporation consisted of three divisions which included General Chemicals, Generic Agrichemicals, and Adhesives. Heidi Talbot saw the opportunity to invest and on 14 December 2005 purchased the General Chemical division. With that GT Chemicals was born! Heidi incorporated GT Chemicals, into her existing company, Midlands Chemicals CC, where she is the Sole Member. Taking over the dynamic staff compliment meant that all the experience and expertise of 18 years of trade was retained. Today GT Chemicals is a recognized and respected brand nationwide.

Cleaning with Technology

*Certificate of
Quality
Our Commitment to you*

*If you are not entirely satisfied with any of our products, do not
hesitate to return it to us within 30 days of purchase for a
100% Money Back Guarantee.*

Our Commitment to you

Environmental Policy

GT Chemicals is committed to sound environmental practices. Through the implementation of an environmental management system, we strive to ensure legal compliance, reduce risk, and to monitor and assess our ongoing environmental performance.

We endeavor to:

- Manufacture and sell goods by considering nature, and the environmental impact of our activities, products and services.
- Implement and maintain a system to continually improve our environmental performance and prevent pollution.
- Comply with all relevant environmental legislation and regulations, related standards, and other requirements that GT Chemicals subscribe to.
- Develop and maintain a framework for setting and reviewing environmental objectives and targets.
- Document, implement, maintain and communicate the environmental policy to all staff.
- Make our environmental policy available to the public.
- Minimize environmental impact by monitoring and assessing our operations regularly.
- Educate and make employees aware of environment considerations as part of their day to day activities.
- Follow the principal of recycling, while conserving energy, water and natural resources wherever feasible.

Health and Safety Policy

GT Chemicals is committed to the Health and Safety of its employees. We believe our employees are the most valuable asset to our Company. With the implementation of a health and safety management program, we clearly state the objectives and commitment to our performance.

We endeavour to:

- Comply with all relevant health and safety regulations and legislations.
- Communicate the health and safety policy to all employees.
- Educate and create awareness with employees of their individual occupational health and safety obligations.
- Create and maintain a work environment in which the levels of risk to the employees and equipment are reasonable and acceptable.
- Understand the set standards and follow them.
- Plan ongoing new and more effective measures.
- Make our health and safety policy available to the public.
- Minimize risks and impacts by regular monitoring and audits.
